No. 5103/26-37

Memoranda on Indian States. 7

Public Works Secretariat. | File No. of 193

Serial No.

30) The number "39,000" appearing on page 149 5th line may be changed to "30,000" as the number of major and minor tanks in the State is only 23,459 as per figures in the Administration Report and the --- total including the small Kuntes and Gokattes may not be more than 30,000.

31) 2. A fresh sentence may, if considered necessary be added after "irrigation" appearing on page 149 7th line as noted below:-

32) "Numerous new reservoirs have of late been constructed among which a reservoir costing Rs.18/- lakhs has been constructed at Anjanapur across the river Kumadvathi and opened for irrigation, supplying water to an area of about 10,000 acres in the dry -- tracts of Shimogs District".

Chief Secretary
with compliments.

THE MEMORANDUM ON THE INDIAN STATES.

The State has raised public loans now and then for financing large Capital Works, and an annual contribution is made from the Revenue Budget towards sinking fund for the repayment of these loans. During the year 1936, a three per cent loan ~~xxhxxxxix~~ to the extent of about Rs.49/- lakhs was floated. The 4% Mysore Railway Sterling Debenture Loan for £.1,200,000 raised in 1886 was repaid on 1st April 1936. The total Public Debt outstanding at the end of December 1936 was about Rs.904 lakhs and the total amount at the credit of the Sinking Fund on the same data was about Rs.277/- lakhs.

Letter No.C.5.719/36-37 dated the 16th January 1937 from the Chief Commandant, Mysore State Troops, Bangalore, to the General Secretary to the Government of Mysore, Bangalore.

===

Memorandum on Indian States

—

Mysore

Para 6.

1) The Mysore Govt have a Separate Department called the Amrit Mahal Department for the Supply and improvement of Cattle and with a view to meet the growing demand of the agricultural population for good cattle, they have recently established a Cattle breeding Station at Hoojampur. The Veterinary Dept is carrying on a campaign to control contagious disease of Cattle, especially Rinderpest. Active immunisation (Serum Simultaneous method) against Rinderpest has been almost universally adopted with most satisfactory

Results and the peasants have realised the efficacy of this inoculation. The Mysore Govt have a Department of Sericulture to look after the rearing of Silk worms and the production of Silk. The State maintains a filature, and gives demonstration and a Silk Weaving and Dyeing Factory) — A. to Domestic basins. The Govt have started Rearing Classes to train reelers in Domestic basin installations.

The above para appears in the book of Memorandum of Indian States' Since 1930.

This will now be sent to the Development Branch for verifying as to the Correctness of the above para and stating the modification, if necessary in the light of the latest developments ~~in Mysore Dept~~

A Brief Synopsis of Important Events in the Administration of the Mysore State for the Calendar year 1936

General

On the 27th June, mainly for reasons of health, His Highness the Maharaja sailed for Europe and returned home early in October greatly benefited in health. He was accompanied by His Highness the Yuvaraja and the Dewan.

Princess Cheluvajammanniyavaru sister of His Highness the Maharaja, died on 12th April 1936, after a prolonged illness.

Messrs. C. Abdul Ghani and A. R. Nageswara Iyer were appointed Judges of the High Court in November 1936 in the vacancies of Messrs. A. S. R. Chari and N. K. Srinivasa Rao, who proceeded on leave preparatory to retirement.

Mr. S. G. Forbes was appointed Chief Electrical Engineer in Mysore from 30th November 1936 in succession to Mr. F. N. Mowdawalla, who resigned his appointment.

Seasonal Conditions.

The seasonal conditions were generally favourable. But the fall in the prices of agricultural commodities for the last so many years has affected the raiyat population. Government had to show several concessions in the matter of collecting revenue.

Finance.

A three per cent 1956-61 Loan was raised for financing certain productive works and the total subscriptions to the loan amounted to about Rs. 49 lakhs. The four per cent Mysore Railway Sterling Debenture Loan for £1,200,000 was discharged on 1st April 1936. The sanctioned Budget Estimates for the official year 1936-37 anticipate a total revenue of Rs. 378·72 lakhs and provide for a total expenditure of Rs. 377·52 lakhs. The programme of capital works for 1936-37 contemplates a total outlay of about Rs. 50 lakhs.

Progress, Moral and Material.

A survey of housing conditions was undertaken in the Mysore City with a view to relieve congestion and remove slums. The Village Panchayets continued to evince great interest in rural reconstruction work.

The conditions of the silk industry continued to be very precarious owing to the keen foreign competition. The erection of the Steel Plant at Bhadravati was completed. The Mysore Cement Works, the Paper Works and the Spun Silk Company have all passed from the stage of projects to that of realities. The work in the Industrial and Testing Laboratory is now carried on in three separate sections, one dealing with pharmaceutical preparations, the next with bitumen products and the third with lac. The demand for bitumen emulsion for treating road surface is on the increase, and it is proposed to set up another plant at Mysore to meet the increased demand.

Public Health

The state of public health was generally good.

Technical Departments.

To meet the growing demand for electric power, the Government sanctioned the raising of the storage level of the Krishnaraj Sagar Reservoir from 120′ to 124′. In the same connection, a scheme estimated to cost Rs. 12·68 lakhs was also sanctioned for the erection of the ninth installation at Sivasamudram, in which it is proposed to instal one unit of 3,000 h.p. in place of two units of 2,000 h.p. A sum of Rs. 25,977 was spent for extending power lines to rural areas. In order to facilitate further expansion in this direction, the Government reduced the gross return expected of such works to 10 per cent.

The development of irrigation under the Krishnaraj Sagar made steady progress. The works so far carried out under the Irwin Canal and its branches have rendered it possible to afford irrigation facilities for about 56,000 acres. Various additions and improvements were effected in the Brindavan Gardens, which have considerably enhanced the beauty and grandeur of the landscape below the Dam. The Anjanapur Reservoir was opened for irrigation in September 1936. The foundation stone of the bridge across the Cauvery at Ramnathpur in the Hassan district was laid by His Highness the Maharaja in February 1936 and work has been progressing rapidly. The obstetric ward attached to the Vani Vilas Hospital, Bangalore, was completed and was opened by His Highness the Yuvaraja. The Children's Hospital attached to the Vani Vilas Hospital was also completed and opened by the Dewan. The total number of power and lighting installations increased from 27,681 to 31,190. The rates for supply of power for industrial and pumping installations and for advertising purposes were reduced. A new scheme for providing 2,000 telephone connections in Bangalore and 600 in Mysore is being pushed through. It now remains to link the local system to trunk telephone system. The construction of the Anandapuram-Sagar Railway is proceeding satisfactorily. Government have sanctioned the construction of a new building for the Railway Central offices at Mysore at a cost of Rs. 5·5 lakhs.

Gold Mines.

A special prospecting license, extending almost over the entire State was issued to the Indian Mines Development Syndicate, Limited, to prospect for gold and silver. The total output of fine gold produced in the mines on the Kolar Gold Field during the first eleven months of the calendar year 1936 was 302,940·673 ounces of the value of Rs. 2,79,73,999.
